DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
2. Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Patrello.

Patrello teaches a backing plate comprising an inner part, with a hub, 14, having a location hole, provided with an inner thread extending over the entire length, and an outer flange, 44, having a surface for adhesively bonding an abrasive article to the backing plate, (col. 5, lines 40-44), the outer flange being formed integrally with the hub. Patrello also teaches the inner part comprising a sunken surface between the hub and outer flange, the sunken surface lying a distance below the surface of the outer flange, and the hub extending above the sunken surface essentially by the distance, (fig. 2).

Allowable Subject Matter

3. Claims 9-12 are allowed.
4. Applicant's arguments with respect to claims 5-8 have been considered but are moot in view of the new ground(s) of rejection.
